

**COVID-19 Exposure Employee Questions**  
**July 10, 2020**

1. What date did the onset of symptoms occur?
2. Did the employee seek medical attention? If so, were they tested and what was the result of the test?
3. When was the last day they reported to the worksite?
4. Who did they come into contact with during the 2 days prior to the onset of symptoms through the last day they reported to the worksite? Include employee, vendors, contractors, and anyone else (i.e., don't limit to just state employees).
5. What was the nature of the contact? For example, was it "close contact" which is defined as within 6 feet for 10 or more minutes? Were individuals wearing masks? Were they inside or outside?

\*All employees identified as close contact 2 days prior to symptoms that were (1) not wearing masks; and (2) the contact was indoors need to leave the office immediately and contact their medical provider to determine next steps.

\*\*For all employees not in the above category, follow up with DHR to determine next steps.
